the JAG Career Association

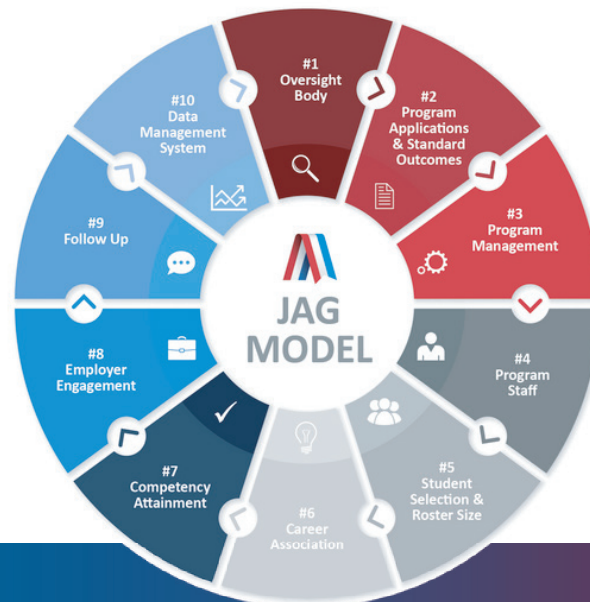

Trauma-informed services to help
youth overcome challenges

Assist participants in securing part-time
employment while completing school

Provide 12 months of follow-up to ensure
employment success and/or transition
to higher education

The JAG Specialist

JAG Specialists are the front-line staff members who implement the JAG model virtually, in-person, or as a hybrid with 45 students identified by schools as facing significant life challenges. They support student successes in the classroom, on the job, and at home.

JAG Specialists are committed to students for 12 months after graduation to help them secure jobs, identify career pathways, and/or move on to post-secondary education.

JAG was founded to be a high-impact force for change in boosting genuine equality of outcomes in education, jobs, and life, and has proven to be one of the “greatest equalizers” in America. Many students need support at this critical point so that they can successfully transition into “what's next”.
